The following is a summary of commercial salmon trolling regulations for the 1992 winter troll season. This regulatory guide was developed to provide the commercial salmon trolling industry with a quick reference of current regulations.

This guide is for informational use. The regulations in it are condensed from official regulations in the Alaska Administrative Code or from those filed with the Lieutenant Governor. A more comprehensive set of regulations is found in the 1991-1993 SOUTHEAST-YAKUTAT Commercial Fishing Regulations which is available at all Fish and Game offices.

The regulations in this guide may be changed at any time by emergency regulation or emergency order. Any changes will be available at the following Fish and Game offices:

FISHING SEASON

The 1992 Southeast Alaska and Yakutat commercial winter troll season begins October 1, 1991 and continues through April 14, 1992.

WINTER TROLL MANAGEMENT

The chinook salmon fishery is managed in accordance with the Pacific Salmon Commission (PSC) Treaty (U.S./Canada Treaty). Chinook salmon caught beginning October 1, 1991 count toward the 1992 quota for all of Southeast Alaska. The all gear quota for chinook salmon in Southeast Alaska is 263,000 for 1992. This number will be adjusted for any overage or underage from 1991 following completion of harvest tallies and estimates from the commercial and recreational fisheries.

The department expects to take no management actions during the 1992 winter troll season. However, the department will carefully tabulate and monitor catches and conduct sampling for coded wire tags in selected ports.

MISCELLANEOUS TROLL FISHERY REGULATIONS RELATING TO FISHING FOR HALIBUT AND BOTTOMFISH

1. Incidental Catch of Groundfish

With the exceptions of sablefish which are prohibited year-round, and lingcod which are prohibited inside the surf line from December 31 to May 31 or whenever the season is closed by emergency order, the holder of a valid interim use or limited entry permit for handtroll or power troll may take groundfish (including all species of rockfish) in any amount while trolling for salmon. The incidental catch of groundfish must be landed and reported on fish tickets using a salmon troll permit.

Lingcod

Lingcod caught on troll and mechanical jigging gear or "dinglebar" gear during the winter troll season, may be retained only from October 1 through December 31 (5 AAC 28.110 (d)(1)). Lingcod must measure at least 27 inches from the tip of the snout to the tip of the tail or 20.5 inches from the insertion of the dorsal fin to the tip of the tail. Undersized lingcod must be returned to the water immediately without further injury. No one may mutilate or otherwise disfigure lingcod in any manner which prevents determination of minimum size. 5 AAC 28.170 (f)

Sablefish

Sablefish are prohibited year-round except during those times and areas opened by emergency order.

Halibut

No halibut openings are expected to occur during the winter troll fishery period.

2. Gear

A handtroll vessel may not have a mechanical jigging device onboard while fishing for or possessing salmon. Use of "dinglebar" gear on power troll vessels is considered to be mechanical jigging and cannot be used while salmon are onboard. A mechanical jigging machine is a mechanical device with line and hooks used to jig for halibut and groundfish, but does not include hand gurdies or rods with reels. 5 AAC 28.050(c) and 5 AAC 39.105 (a)

3. Participation

A troll vessel or a person aboard a troll vessel, for which commercial hand troll, power troll or mechanical jig fishing gear was used to take fish during the 72 hour period immediately before, or which will take fish during the 24 hour period immediately after an open trolling period, may not participate in the taking of salmon during that open period (5 AAC 39.270(i)).
